REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record to Yamada (5,318,393) does not disclose chamfers between a crest face and both following and leading flanks in a beveled lead of a screw part in a high speed forming tap. Yamada teaches relief areas in a following flank that are formed in lower and upper areas of the following flank and that an upper relief area along a ridgeline is located on a complete thread (col. 4, lines 12-15). It would not have been obvious to the skilled tapping artisan to provide the chamfers as claimed by Applicant in view of the teaching of Yamada since Yamada teaches only a single chamfer on a following flank of a complete thread turn. Applicant's claims are directed to a beveled tip of a tapping tool as opposed to complete thread turns as taught by Yamada and the Examiner points to Applicant's response (10-25-2007) on page 2, lines 9-12 that discusses the necessity of the chamfers in a beveled lead to reduce a load applied to a cutting edge corner part in the beveled lead.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Ed Tolan whose telephone number is 571-272-4525.
